- Data Entry, Reporting & Structured Documentation
- Version Control & Digital Asset Management (Git, GitHub)
- Copywriting & Technical Writing
- CRM Management & Client Record Keeping
- Cross-Functional Team Collaboration
- Confidential Information Handling

PROFESSIONAL EXPERIENCE

Executive Virtual Assistant & Operations Coordinator

MarketForce | Nairobi, Kenya (Remote) | *June 2021 – Present*

- **Inbox & Communications Management:** Owned all inbound and outbound digital correspondence on behalf of senior leadership — triaging, prioritising, drafting, and filing emails and messages with zero communications missed and every query receiving a professional, timely response across a user base exceeding 10,000.
- **Calendar & Schedule Coordination:** Maintained and protected the leadership calendar across multiple concurrent workstreams — scheduling meetings, resolving conflicts proactively, blocking focus time, and preparing full context briefings ahead of every appointment.

- **Research & Executive Briefings:** Conducted rigorous analytical research using credible primary and secondary sources, producing structured performance summaries, technical analyses, trend reports, and executive intelligence briefings — translating complex information into clear, decision-ready outputs.
- **Technical Workflow & Operations Management:** Designed and maintained operational workflows and technical processes in production, partnering with senior team members to ensure timely execution for a user base exceeding 10,000 — delivering high-quality outputs and refining features based on user insights in a fast-paced startup environment.
- **Project & Workflow Coordination:** Coordinated multi-format operations and delivery projects across engineers, designers, and project managers — managing timelines, tracking deliverables, escalating blockers, and ensuring cohesive output with minimal supervision under stringent deadlines.
- **SOP & Process Documentation:** Developed and maintained precise standard operating procedures, workflow guides, and technical documentation — creating replicable, audit-ready records that improved team efficiency and supported seamless onboarding of new team members.
- **Systems & Performance Optimisation:** Identified and resolved 15+ operational and system issues to improve overall workflow quality and streamline performance — applying a structured, analytical approach to root-cause analysis and solution implementation.
- **Quality Assurance & Deployment Support:** Conducted thorough testing of CI/CD deployments and documentation to facilitate seamless transitions and scalability — ensuring all operational processes met quality and compliance standards before rollout.
- **Version Control & Digital Asset Management:** Oversaw version control processes utilising Git and GitHub within a collaborative remote framework — effectively managing digital assets, tracking changes, and responding to evolving priorities under stringent deadlines.
- **Stakeholder Relationship Management:** Built and sustained trusted working relationships with clients and collaborators in fully virtual environments — delivering regular updates, managing expectations with clarity, and resolving issues before they escalated.
- **Feedback Integration & Continuous Improvement:** Actively sought and implemented constructive feedback from senior stakeholders — demonstrating coachability, growth orientation, and a consistent drive to raise the quality ceiling of every deliverable.

Operations Assistant & Community Coordinator

Mama Ngina University — Technology Department | Kiambu, Kenya | 2021

- Organised and hosted monthly productivity and technology workshops for 50+ participants — coordinating logistics, preparing materials, managing communications, and ensuring seamless delivery from planning through execution.
- Led a cross-functional team of 4 to develop and deliver a full-stack inventory management system — coordinating workstreams, managing timelines, and optimising operational processes to achieve a 30% improvement in query performance.
- Designed workflow improvements to enhance operational query performance — applying analytical problem-solving to identify inefficiencies and implement structured process changes.
- Managed open-source contribution workflows on GitHub — including issue tracking, documentation updates, and collaborative review processes — maintaining organised, audit-ready records across all project activities.
- Volunteered as a digital operations coordinator for local Nairobi nonprofits — building and maintaining web presences and digital tools to support community initiatives using HTML, CSS, and JavaScript.

KEY PROFESSIONAL STRENGTHS

- **High Agency & Self-Direction:** Consistently identifies gaps, proposes solutions, and executes without requiring micromanagement — the hallmark of a top-performing remote executive assistant.
- **Technical Fluency:** Brings genuine technical depth in systems, APIs, and digital operations — enabling seamless management of technology-facing workflows and communications that most executive assistants cannot handle.
- **Flawless Written English:** Produces publication-standard emails, reports, briefs, and documentation — communicating complex ideas clearly and professionally across every format.
- **Analytical Thinking:** Synthesises information from multiple sources into structured, decision-ready outputs with the clarity and precision senior executives depend on.
- **Discretion & Integrity:** Consistently handles confidential business, client, and strategic information with the highest degree of professionalism and trustworthiness.
- **Global Time Zone Flexibility:** Structured for seamless remote collaboration with founders and teams across PST, EST, GMT, and EAT — reliable, responsive, and available.
- **Continuous Professional Development:** Actively invests in certifications, tool mastery, and skill development — committed to staying ahead of the evolving demands of world-class executive support.

ADDITIONAL INFORMATION

- Active contributor to open-source projects on GitHub — including documentation, issue tracking, and bug fixes — demonstrating structured collaboration and version control discipline in distributed remote environments.
- Volunteer digital operations coordinator for local Nairobi nonprofits — building and maintaining digital tools and web presence to support community initiatives.
- Regular participant in online hackathons and tech communities — maintaining continuous learning and staying current with emerging productivity tools and workflow innovations.

- Strong analytical and problem-solving foundation from competitive programming — directly enhancing debugging efficiency and structured thinking in fast-paced operational environments.
